**SPEECH ON
THE STATE OF THE UNION 2022 :
MYTHS AND REALITY.**

SPEECH ON THE STATE OF THE UNION 2022 : MYTHS AND REALITY.

I. EXCERPTS FROM Mrs von der LEYEN'S SPEECH (Comments in red)

"For the first time in its history, this Parliament is debating the state of our Union as war rages on European soil.

We all remember that fateful morning at the end of February.

All over our Union, Europeans woke up, overwhelmed by the weight of the news coming from Ukraine.

Shaken by the return of an implacable Evil.

Haunted by the sound of sirens and the brutality of war.

But from that moment on, the entire continent stood up in a wave of solidarity.

From that moment on, the Europeans did not back down or hesitate.

They have found the courage to do what is right.

And from that moment on, our entire Union has risen to the occasion.

Fifteen years ago, during the financial crisis, it took us years to find lasting solutions.

Some ten years later, when the pandemic hit us, it only took us a few weeks.

But this year, from the moment Russian troops crossed the Ukrainian border, we immediately and firmly responded by presenting a united front.

And we should be proud of that."

No, Madam, Europe has nothing to be proud of!

You have waited too long time to help Ukraine.

The EU members have always refused, and still refuse to build a Common Defense by delegating all their Security Policy to NATO, which is led by and for the Americans.

This American NATO policy will lead us to other fields of war because "happy globalization" has enriched the world's worst dictatorships.

Better still, the Americans have given them all the technological keys while we have locked ourselves in a world of old, that of processing companies.

The beautiful German industry grateful!

We have let Russia in Georgia, Syria, Crimea, Belarus and we have waited so long to intervene in Ukraine that now the United States is conducting its own policy in Europe.

We are letting a NATO member, Turkey, ally with Russia, intervene in North Africa and Syria and even threaten Greece in the Aegean Sea.

The reason?

Always the same: the beautiful German industry grateful!

As for the management of the financial crisis and the pandemic, the European Council imposed suicidal policies on the European Commission.

Since the creation of the euro, Europe is in trouble, Madam, it has made choices against peoples, and people are now taking refuge in the arms of nationalism and extremism.

[...]

ALTER-EUROPA
For another Europe
And (of course) for Another Euro

*It is a war against our energy security, against our economy, against our values and against our future.
A war of autocracy against democracy.*

The policy of the European Union is dictated by High Finance.
When it loses a lot of money in its speculative games, it is within the European Council that the ECB negotiates its bailout by putting the rope to the people's neck.
Since 31/12/1998, 13.000 billion euros (in various forms) have been granted or authorised to «save finance».

Yes, the ECB has weakened the people of Europe by stealing and indebting them.

Read JUNO MONETA's book: «*Dollar et Euro: Comment la Finance a tué nos démocraties*».

[...]

Ladies and gentlemen,

One of the lessons of this war is that we should have listened to those who know Putin.

You were a member of Angela MERCKEL's governments, and you dare to tell us this?
No, once again, a lot of cheap gas and oil was needed for **the beautiful German industry**.
And, today, Germany wants to build the largest army in Europe?

Or build the largest arms industry in Europe?

[...]

Let us rediscover the spirit of Maastricht - stability and growth necessarily go hand in hand.

*We have proved that the Maastricht Treaty is a failure of democracy.
"Your" Europe is today in the hands of High Finance and, while you talk about «the beautiful Europe», your financiers are creating the ultimate trap for our democracies.
With the complicity of the BIS, sixty-three central bank, including the ECB, are consolidating their «total independence» by creating their «cryptocurrency», the digital euro.
All the operations of High Finance and multinationals will soon be locked by digital keys to leave no trace.
You didn't even mention this project when it is scheduled to be completed in 2023.*

[...]

Ladies and gentlemen,

As we embark on this transition within our economy, we must build on the immutable values of our social market economy.

Madam, the market economy is strictly anti-social, and you play with words.

The priorities are not these but:

- the harmonious development of the internal market
- the elimination of banks and companies whose purpose is to dispossess us
- Recovery in southern and less developed regions
 - ✓ and therefore: the creation of a strong network of small and medium-sized enterprises in all Regions
 - ✓ and therefore: the creation of development banks for capital injections in small and medium-sized enterprises in these Regions
- research and development compatible with the future of humans and their environment
- Fair distribution of value added among shareholders, employees and annuitants
- the fight against unjust enrichment
- combating fraud of all kinds.

In short, priorities are exactly what you do not do.

[...]

ALTER-EUROPA
For another Europe
And (of course) for Another Euro

Our social market economy encourages everyone to excel, but it also takes into account our fragility as human beings.

It rewards performance and guarantees protection.

It opens up possibilities but also imposes limits.

This is even more necessary for us today.

Madam, the market economy has imposed so much suffering and limits on us that far-right parties are coming to Power all over Europe.

Expect the worst!

Europe is in a very bad situation.

[...]

Our future competitiveness depends on it.

We need to remove the barriers that still hold back our small businesses.

They must be at the centre of this transformation, because it is on them that Europe's long history of industrial prowess rests.

And they have always put their employees first, including, if not especially, in times of crisis.

Inflation and uncertainty weigh particularly heavily on them.

The ECB played with fire to "save" Finance.

Now ECB is under pressure : they no longer hesitate to admit that the rate policies will destroy millions of jobs, incomes and small businesses in the name of fighting inflation ⁽¹⁾.

[...]

The lack of manpower is also a challenge for companies in Europe.

The number of unemployed has never been lower.

That is a good thing.

But at the same time, the number of unfilled job offers is at an all-time high.

No, madam, our charming European administrations are doing everything to hide the truth. They adopted the "great ultra-liberal values" of the International Labour Organization (and its definition of "unemployment") before inventing all sorts of social traps to avoid identifying a mass of increasingly precarious people.

Yes, these statistics are manipulated

but that does not prevent you from citing them as a performance.

[...]

Our needs for rare earths alone will increase fivefold by 2030.

And that's a good sign!

Is this a good sign?

For the beautiful German industry?

Or for the environmental damage in Africa and elsewhere?

[...]

That is why I will propose the ratification of the agreements with Chile, Mexico and New Zealand.

And we are continuing negotiations with important partners, such as Australia and India.

Well, let's not change anything.

Happy globalization is always your lucky charm.

For the profits of the multinationals but not for the people.

[...]

¹ This policy is, of course, led by the FED, which means:

1) *Upcoming turbulences - AFP 7/10/2022 - Employment slows down somewhat in the United States, but not enough in the face of inflation*".

2) *"Strong employment data indicates that the Federal Reserve will continue with its aggressive interest rate hikes to cool the economy and fight persistently high inflation, causing economic pain" (CNN Business 2022-10-08).*

Queen Elizabeth is a legend!

She has embodied the constancy in the face of all the turbulence and transformations of the last 70 years. She carried out her duties with stoicism and loyalty.

This is a disaster!

The British royalty is part of another era, an era you seem to regret, but you forget that "British democracy" is dominated by the House of Lords which defends the rights of the British aristocracy and the Anglican bishops.

Yes, it is true that the beautiful German aristocracy, of which you are a member, has established the majority of the crowned heads of this unequal, antisocial and warlike Europe.

Even «the **House WINDSOR**» is from «the **House of Saxe-Cobourg and Gotha**» but it still maintains the lie about its origins and the history of England itself by conveying this kind of information: "*Charles III ends a millennial tradition that will affect all British*" (YAHOO, October 9, 2022)

Blessed bread for you?

[...]

Since the end of the Second World War, we have kept the promise of democracy and the rule of law. Nations around the world have built together an international system that promotes peace and security, justice and economic progress.

Today, however, it is this very system that is the target of Russian missiles.

No, Madam, since the Second World War, Bank for International Settlements (BIS), the World Bank and the International Monetary Fund (IMF) have promoted the World Order against which missiles of all kinds will fall.

Of course, Russian missiles respond to the same philosophy of domination, but all the strategies of "**poor your neighbour**" (mercantilism) have led to wars.

Germany and the European Union should have remembered this.

[...]

We have the same vision of the world.

And we must mobilize our collective power to shape global public goods.

We must strive to expand this core of democracies.

The most immediate way is to deepen our ties and strengthen democracies on our continent.

Starting with the countries that are already on the way to joining our Union.

We need to be by their side every step of the way.

Indeed, the path to strong democracies and the path to our Union are one.

I therefore want the people of the Western Balkans, Ukraine, Moldova and Georgia to know this: You are part of our family, your future is within our Union, and our Union is not complete without you!

Madam, let us hope that the "European family" will learn from the courage of the Ukrainian people by ending this policy of slavery, based on servile subcontracting (your vision of the World).

The German people themselves will be grateful.

[...]

We will not let any Trojan horse launched by an autocracy attack our democracies from within.

For 70 years, our continent has been moving forward on the path of democracy.

But the benefits of our long journey are not guaranteed.

For too long, many of us have taken democracy for granted.

Especially all those who, like me, have never lived under the yoke of an authoritarian regime.

Our Trojan horse is the Bank for International Settlements (BIS) and its High Finance.

We are still people under the yoke, and you are helping to expand their powers.

[...]

ALTER-EUROPA
For another Europe
And (of course) for Another Euro

Ladies and gentlemen,
Democratic institutions must constantly win and regain the trust of citizens.

You will be disappointed, Madam, you will end this mandate in the worst conditions.

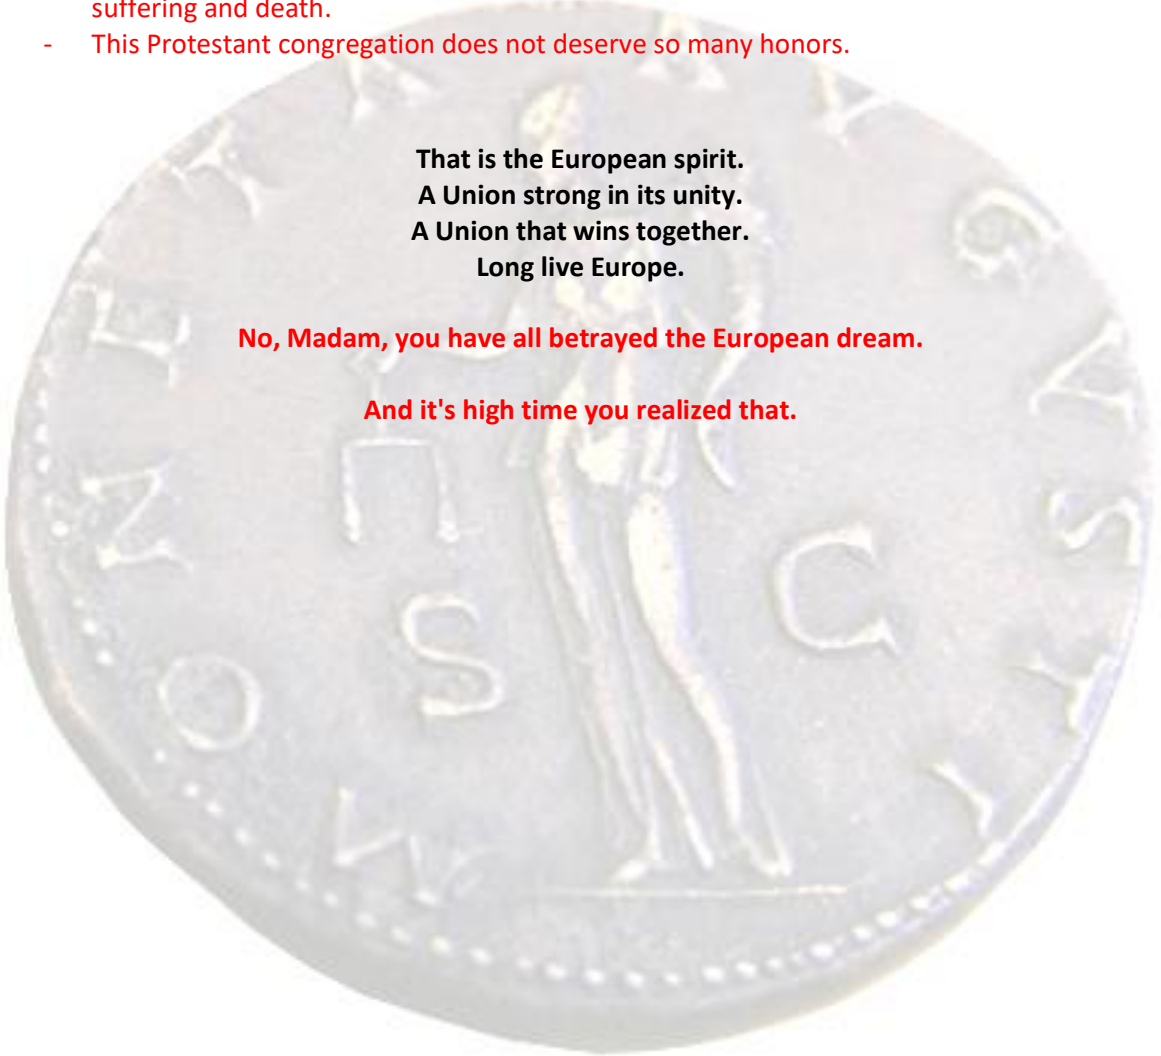

[...]

Ladies and gentlemen,
Three weeks ago, I had the incredible chance to be able to join 1500 young people from all over Europe and the world to gather in Taizé.

[...]

Madam, this was not your place for two reasons:

- Only secularism will save us from all those religious wars that have caused so much suffering and death.
- This Protestant congregation does not deserve so many honors.

**That is the European spirit.
A Union strong in its unity.
A Union that wins together.
Long live Europe.**

No, Madam, you have all betrayed the European dream.

And it's high time you realized that.

II. TRUE "STATE OF THE UNION": THE FACTS.

Faced with such a Manichean presentation of the European Project by Mrs von der LEYEN, it seemed urgent to me not only to denounce her speech by putting my comments (in red) but also to remind her of certain truths about the Maastricht Treaty and the dysfunctions of Political Europe before drawing the necessary conclusions.

A. THE MAASTRICHT TREATY IS THIRTY YEARS OLD THIS YEAR

The balance sheet of the euro, the euro zone (19) and the EU-27 is not glorious: it is the Maastricht Treaty that must be abolished as soon as possible.

My book: *"Dollar and Euro: How Finance Killed Our Democracies"* (in French and English) denounces precisely the fact that this Maastricht Treaty was entirely drafted by the Bank for International Settlements or BIS (a private company that is not "the central bank of central banks") to impose the ferocious dictatorship of High Finance.

1) To "stick" to the news, let's ask good questions.

- Who decided on the "necessity" of creating a **digital euro**?
- Isn't the current euro a digital currency (97%)?
- How is it that so many countries and /or monetary areas have taken **the same decision at the same time**?
- Who will help the ECB shape this project as early as 2023?
- Who is wondering within the political class about "wonderful project"?

QUESTIONS?

- Who will endorse this project? On what criteria?
- When will parliamentary debates take place?
- At european level and at the level of nations?
(Answer: never).
- By the way, who will benefit?

What if this change of currency prepared for the break-up of the euro zone?

am at the disposal of the European peoples to «dig» all these questions (and avoid them the worst)!

But I immediately warn the whole European Left, the Greens and the parties of the Ultra-Left: you will pay dearly for the fruitless debates that you constantly impose on us...

Your electoral failures will multiply after 2023 because the BIS has programmed to pull the rug out from under all opposition parties.

In other words, the BIS hired us in a game of Chechmate.

It is the Far Right and the Conservative Right that will reap the benefits.

**These are above all, and once again, High Finance and multinationals
who will reap incutive benefits.**

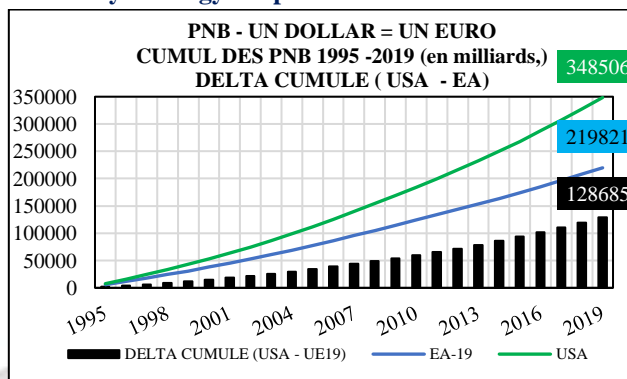

**On the other hand, we have a "secret boot"
to deal them "the fatal blow".**

ALTER-EUROPA
For another Europe
And (of course) for Another Euro

2) The long-term comparison of the GDPs of the Eurozone (EU-19, reconstituted since 1994, just after the Maastricht Treaty) and the United States is simply astounding.

This work was represented by a graph in the book mentioned :

Figure 25: Abandonment of any Strategy: Impact on CUMULATIVE GNP 1995 – 2019 (€MD)

Comments on Graph 25:

- In 1994, the GDP of the United States was of the same order as ours: \$7,640 billion against \$5,742 billion (USA/EU-19 = +33%).
- To avoid biasing these official statistics (World Bank in dollars and Eurostat in euros), I kept the rate of ONE DOLLAR = ONE EURO.
- On this Graph 25, the sums of cumulative GNP 1995 – 2019 are of course colossal: 219,821 billion euro for the EU-19 against 348,506 billion dollar for the USA (USA/EU-19 = +58.5%).

Clearly, we have done "much worse" than the United States, which is in a phase of regression because of all its budgetary, trade and payment deficits.

3) Since September 2022, Christine LAGARDE's ECB has adopted VOLCKER's monetary policy by openly displaying a total contempt for the people.

However, no one in "honest" economic circles that the choice of VOLCKER led to the destruction of the American economy, the most successful economy in the World before the 1980s, by annihilating the entire domestic fabric.

TRUMP did not come to power by accident, and the fight of the far right is not over in the United States. Some media and politics even mention the risk of a civil war.

Indeed, everyone knows that this policy leads to the enrichment of banks and the multiplication of company bankruptcies, with colossal losses of jobs and income (wages, pensions).

"Regaining and maintaining confidence requires us to quickly bring inflation back to our target," said Isabel Schnabel – ECB – Germany.

"Even if we enter a recession, we simply have little choice but to maintain the direction of our policy," she added.

"If inflation expectations were to become unsettled, the impact on the economy would be even worse."

Meanwhile, Christine LAGARDE multiplies her disguised aid to High Finance by exceeding her powers: it is now the ESCB (led by the ECB and the BIS) which «makes politics» in Europe.

Trap for inconsequential political parties, they let it happen and, better, they applaud its initiatives: fight against the pandemic (no, the ECB did nothing); fight against climate change (ECB-wide climate agenda: who appropriated it?); green bonds (who benefits?); support for OTC markets (SESFOD: who understood?); support for Ukraine (so little); fight against the risk of splitting up the eurozone (who can believe it?); fight against inflation (who thought of the disaster to come?), etc.

In fact, the Central Banks of the 63 BIS participants have "lost control" of the consequences of their "conventional and unconventional policies".

And no one's reporting them!

No one condemns them!

While we must forbid them all to continue their game of dirty kids!

B. POLITICAL EUROPE

Politically, the European Union is highly open to criticism.

1) Europe is not "protective".

It only takes a "small" threat of invasion by Russia to realize that we depend entirely on the U.S. military to defend ourselves.

This "assistance" has a cost: the Americans supply their weapons to virtually all European countries, including Switzerland. And these are not gifts but loans!

This "indispensable assistance" is also the result of a sneaky policy of NATO and High Finance who want to conquer the world from West to East, from North to South, from ocean to ocean, even if it means enriching our worst potential enemies: China, Russia, Turkey, Saudi Arabia and the fiercest dictatorships in the World.

2) Germany is highly responsible for this situation.

It has used the "single market" and eastern enlargement policies to source agricultural materials, industrial raw materials, slave labour and cheap labour (immigration) to destroy a whole bunch of vital economic sectors among its most reliable partners.

Even the German population suffers because, as you can see, their food is not healthy (too much pork, sausage and starchy foods) and the quality of everyday goods has been taken in hand by the big brands of the German Hard Discount, with questionable quality products.

3) The European Union has fostered a Europe of thieves.

Luxembourg, the Netherlands, Ireland and Flanders have built legal and tax systems that deprive other partners of their tax revenues.

Better, Ireland has taken over the Anglo-Norman type of Closed Holdings system to allow insurance groups to steal our savings (supplementary pensions, life insurance).

It also allows American groups to hide their financial assets and profits with impunity.

4) The European Union has even missed all the technological shifts.

The services sector (other than bancassurance and the distribution of mainly imported products) is now dominated by Americans: software, networks (including transoceanic wiring and satellites), space (rockets, space projects), pharmaceutical innovations, innovations in remote care and surgery equipment, advanced electronic equipment, defense, cybernetics, ...

The list of our weaknesses is sickening.

5) The European Union and the European countries have become the benchmarks of senior careerist officials.

These senior officials are there to concentrate our material wealth, our heritage wealth and our financial heritages in the hands of increasingly powerful actors, acting legally outside the nations and the European Union itself.

Their powers consist of a "laissez-faire" policy that allows transnational corporations and high finance to "play politics" instead of political parties, parliaments and people's choices.

And of course, they serve themselves... instead of serving (the people).

6) At a time of "austerity policies", the ECB announces its own political choices.

It will "encourage" various policies by buying shares and bonds of private companies: it is it that chooses its interventions, without any debate, without any consultation but, as RECLAIM FINANCE points out, with its "Green Central Bank Scoreboard of the G20", all these operations are **Greenwashing**.

Better still, it is a strategy of enslavement of populations: ever more public debts, ever more profits, ever fewer rights for the populations.

ALTER-EUROPA
For another Europe
And (of course) for Another Euro

7) The banks are doubling down.

They finance these large groups by making very large profits, then they refinance themselves cheaply with the ECB, then they speculate against everything that moves by lending money to their subsidiaries specializing in tax paradises, inside and outside the European Union.

8) Behind the beautiful images on the commitments of the European Union (Green Deal, Cultural Heritage, Architecture, Audiovisual, Books and Publishing, Music), there are everywhere "expert groups", "meetings", "subgroups", "individual members", "personal capacity", "organizations", ...

By the way, where are the political parties?

9) Is the worst ahead of us?

We all thought that Angela Merckel's Germany would be criticized within the European Union, and especially by her successors, for its compromises with Putin's Russia, with Erdogan's Turkey, with RBS's Saudi Arabia or with China's murderous regime.

Que nenni!

Olaf SCHOLTZ wants even more openness to the East, to Georgia, and he wants to build the largest army in Europe.

At my age, born just after the war, and after living in an area occupied (and destroyed) three times by the German army, I am frightened to hear a German Chancellor talk about a German army that is powerless and a German economic power that is at the forefront of arms exporters.

III. CONCLUSION

No, time is over, Madame von der LEYEN.

We want to draw a line on all that you present to us as democratic achievements, starting with the Maastricht Treaty, the sneaky importance of the Bank of International Settlements ((the oldest international institution, created by Europe in 1930) and the «American institutions» (created in 1944) that dictate your programs.

So we want to finish with:

- **Untouchable Central Banks**
- **Their conventional and unconventional policies** that create counterfeit money
- **Commercial banks, which have become “Institutions”** (Monetary Financial Institutions) that have taken over all our central banks
- **The privileges granted to Insurance Groups** for their “wonderful” products of life insurance, supplementary pensions and supplementary health insurance
- **The “free movement of goods and services”** that kill our jobs and incomes in your “happy globalization”
- **The “free movement of capital”** which is in fact the **“free movement of liquidity”** that allows the almighty to leave member countries, the Eurozone and even the European Union **with our Money and our Savings** to speculate on everything that moves, to “kill” our purchasing powers and therefore our lives (right of subsistence and right to existence)
- **“Your freedom”** to deprive us of the free movement of persons at the slightest opportunity
- **“Your freedoms”** to constantly give you new rights of intervention with your “exclusive powers”, your “shared powers” and your “supporting powers”.
Yes, Madam, people have the right to refuse in their food and in their own environment chemical and phytosanitary treatments, dangerous to health (carcinogenic, intrusive or simply resistant to natural degradation), “authorized” additive soups, dubious vaccines, and the thousands of decisions that your “competent persons” take the place of populations
- **False friends** such as Luxembourg, Ireland, the Netherlands, Flemish Belgium, and all the new (European) enemies of the Democracy.
- **Real legalized decision makers in the system who have become “individual members” and advisors with “personal capacity”** : they draft your laws and decrees to “regulate” banks, insurance groups, multinationals and their infamous (suicidal for Europe) practices.
- **“The indispensable sacrifices”** that have penalized our growth since the creation of the European Monetary Institute (1994), created in the wake of the Maastricht Treaty.

**No, Madam, your Europe is not ours,
and you will end your mandate in the worst conditions,
for us as for you.**
